

Using FEMA Emergency Management Institute Independent Study Program 101

Syllabus

Description

Administered through The Security Officer Network's custom curriculum and assessment portal, the Using FEMA ISP 101 course is The Security Officer Network's primer on security industry professional development through the FEMA Emergency Management Institute's online training program.

Objectives

Upon completion of the course, the participant should:

Understand importance of the FEMA training certificate;

Have an awareness for how to use the certificate;

Know the strategies for selecting the FEMA ISP programs most beneficial to the security officer and his particular circumstance; and

Develop a familiarity with the FEMA ISP online portal, FEMA SID number and FEMA transcript request form.

Requirements

The participant must submit five reading assignments and complete a five-question timed assessment.

Level

This is a basic, first-level course; it is suitable for all participants.
