

The Professional Security Officer II Course Syllabus

Description

Administered through The Security Officer Network's custom curriculum and assessment portal, the PSO II course allows participants to study and prove understanding of best practices for security officer conduct.

Objectives

Upon completion of the course, the participant should:

Establish self assessment and mistake avoidance systems;

Create a private security industry career plan;

Understand the benefit of early career experience diversification;

Know the importance of establishing pre-supervisory, mentor-mentee relationships; and

Initiate regular efforts to develop a broad base of private security industry knowledge.

Requirements

The participant must submit twelve reading assignments and complete a 15-question timed assessment.

Level

This is a basic, first-level course; it is suitable for all participants.
