Security Manager II

Three Hours

Lesson Link:

thesecurityofficernetwork.com/training/security-manager-2

Description

Administered through The Security Officer Network's custom curriculum and assessment portal, this is the second part of The Security Officer Network's comprehensive primer on private security management. Told from the perspective of the small security owner who directly manages his own security agency, many of the lessons in the course are germane to any security supervisor.

Objectives

Upon completion of the course, the participant should:

Know the importance of streamlining costs;

Be prepared to implement Key Performance Indicators (KPI); and

Understand the science of patrol route design.

Requirements

The participant must submit six reading assignments and complete a fifteen-question timed assessment.

Level

This is an advanced level course.
